The Darley Tactical Pumper™ is a state-of-the-art apparatus designed to meet the dynamic needs of modern firefighting and rescue operations. It combines superior performance, reliability, and versatility, making it an invaluable asset for any emergency response team. With a price point 50% less than a traditional pumper, Darley's Tactical Pumper™ is a highly affordable, highly capable offering. Darley's Tactical Pumper™ comes standard with Auto CAFS ensuring efficient, effective water utilization and enhanced fire suppression capabilities. Customer can also configure their Tactical Pumper™ with a water only or water and foam pumping system. The Tactical Pumper™ is also available on a F550 Chassis.

Features

- NFPA compliant
- Rear receiver hitch with trailer wiring and optional portable winch power leads
- Includes a 2½" Darley AutoFill™ - Once connected to a pressurized source of water, this direct fill feature keeps the water tank between ½ and "FULL" automatically
- Low cost of maintenance
- Ease of driving - Drivers report having greater confidence when driving this vehicle over larger trucks
- Darley Auto CAFS advanced Firefighting technology optimizes water utilization and enhances fire suppression capabilities
- Standard light package includes LED Warning lights, 360 degree scene light coverage, & traffic advisor to aid in first responder safety when duty calls
