URBAN INTERFACE eMAX PUMPER

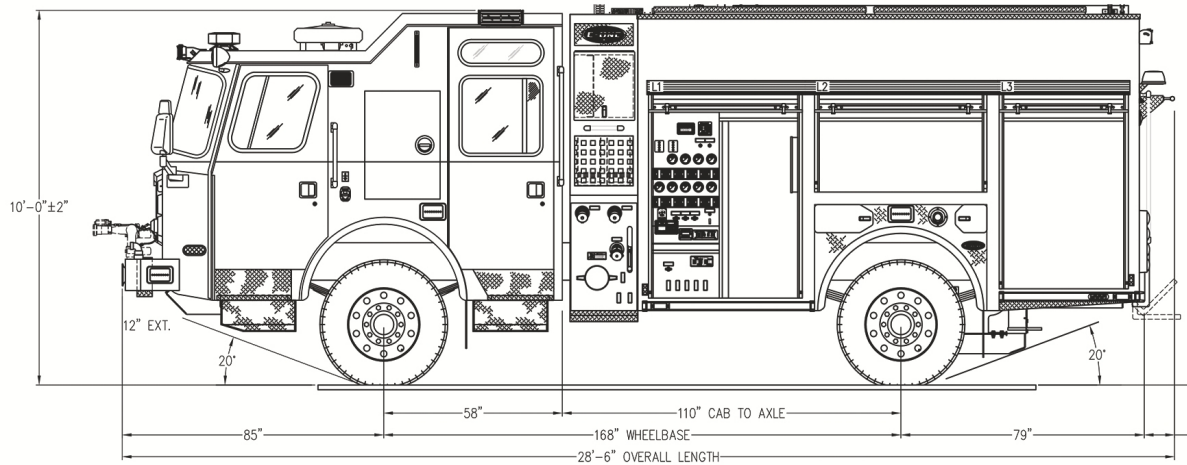

SPECIFICATIONS

TAKE EMERGENCY RESPONSE TO THE MAX, THE eMAX.

One of the industry's most innovative apparatus designs, the eMAX, now meets the unique, diverse demands of Urban Interface. The Urban Interface eMAX offers maximum maneuverability with a short 168" wheelbase; maximum storage space for a configuration of this size with up to 340 cu. ft. of storage; maximum accessibility with low, pre-connected handlines and a rear access ladder; maximum Urban Interface with a 20 degree angle of approach and departure for off-road clearance, front skid plates and fuel tank brush guard for off-road protection, low profile bumper turret with joystick controls, and an optional hydraulic pump and roll system.

All these features combined allow your department to maximize its performance with the Urban Interface eMAX by E-ONE.

CHASSIS

- Quest®, Cyclone® II or Typhoon® chassis
- Medium, long and extended length 4-door cabs available
- Optional vista roof in three heights
- Wheelbase as low as 168"
- Up to 600 HP Engine
- Standard safety features such as roll cage cab, CrewGuard & ABS brakes
- Optional safety features such as airbags & G4 (electronic stability control)
- Optional 4-wheel drive
- Available with galvanized frame for corrosion protection

BODY

- Body available in 3/16" extruded aluminum or stainless steel
- 530 to 780 gallon tank capacities available with integral foam cells
- Lower pre-connected hand lines and shorter wheelbase than conventional designs
- Low-mounted speed-lays and back board storage
- A convenient access panel in the forward compartment on the officer's side allows for easy access when servicing the pump and plumbing
- Low-mounted rear hose reel
- Full height full depth driver and officer side compartments and two roof top storage compartments for up to 340 cu. ft. of storage space
- Recessed ladder rack
- Popular options: hinged or roll-up doors, adjustable shelves, roll-out trays, tool boards, SCBA storage, aluminum or vinyl hose bed covers, low hose bed for easier access, and wide or narrow upper storage compartments

FIRE PACKAGE

- Side-mount pump operator controls
- Compact pump operator panel design is less than 24" wide
- Pumps up to 1500 GPM
- Hydraulic pump and roll
- Manual or electric valves
- Class A or Class B direct injection foam systems, CAFS or ATP foam systems available
- Tried and true split shaft pump drive design does not rely on a continuously spinning power take-off, resulting in less noise, less moving parts and less wear and tear on your apparatus
- All discharge controls are conveniently located at the pump panel, away from discharge hoses
- Low intakes for easier hose connection

ELECTRICAL

- Multiplex electrical system provides increased feature capability and improved diagnostics
- Color vista display available
- Whelen® optical and audible warning packages standard, others optional
- Fixed and pole mounted scene lighting
- Optional 6-20 KW hydraulic generators
